

The Attic Vac by Ruwac may be your primary solution to removing bulk materials, but it's also your proven solution in final cleanups and general housekeeping of fine dust and residuals. Using your preexisting system's setup while attaching it to a y-adapter and a series of hoses, wands, and tools can turn your Attic Vac into a multi-user system that doubles productivity for cleaning fine dust from hard-to-reach areas and putting the finishing touches on leaving your job spotless!

90132ID-BL Y-Adapter Splitter

	90132ID-BL	<ul style="list-style-type: none"> • Y-Adapter Splitter • For the connection of your Attic Vac vacuum's 3" hose to (2) 2" hoses for multi-operator use • Can also be attached directly in the inlet of the HEC to run a 2" hose for short distances (Note: Restricted to 25')
