# WORKHORSE QUIET VAC

## DS 1 SERIES CONTINUOUS DUTY VACUUM

Need a continuous duty, ultra-rugged quiet operating vacuum for your application? Ruwac's DS1 Quiet Vac Workhorse Series vacuums are unparalleled in performance and reliability. Whether your application involves point of source extraction, process handling, or general shop maintenance, our Quiet Vac Workhorse Series delivers powerful results alongside sound suppressed technology that comes at no expense to your vacuum. Equipped with pleated MicroClean filters, and an innovatively designed filter cleaning system, our vacuums are 99.9% efficient at 0.5 microns. The modular housing is state-of-the-art with carbon impregnated compression cast composite fiberglass that will not dent or rust, allowing your vacuum to last for years. Powerful enough for central vacuum systems, the DS1 Quiet Vac Workhorse Series is also compact and completely portable. Ideal for multiple operators and vacuum assist tooling, the Quiet Vac Workhorse Series vacuum fits a variety of attachments and accessories tailored to suit your application.

### FEATURES

Advanced sound suppression system separates and channels vacuum air.

Custom motor controller monitors motor temperature.

Foot lever actuated dustpan is ideal for dust-free emptying.

Optional HEPA filtration allows for absolute filtration.

### How MicroClean Filtration Works

Our low-loading MicroClean filters are specifically designed to collect and contain fine powders and dusts. The innovative pleated design allows filter area to be maximized within a confined space. There are no paper or cartridge filters here; our filters are made out of only the best quality materials to ensure longevity and performance. Our filters are 99.9% efficient at removing particles down to and including .5 micron. Unlike cartridge or paper filters which need to be replaced, our filters are permanently installed, can be cleaned without disassembling the vacuums, and are backed by our 3-year warranty.

Pleated paper and cartridge filters can become distorted with too much filter cake, rendering a vacuum useless. With a Ruwac vacuum, you never have to worry about collapsing filters; ours are protected with a steel frame and wire mesh inserts to preserve shape and integrity while vacuuming and cleaning. Furthermore, an external manual cleaning assembly allows users to rid the filter of dust accumulation, extending filter life and renewing air flow. So stop messing with the rest - and put a Ruwac filter to the test.
