

**Our 1.5" Overhead Cleaning poles were a world first when they first entered the combustible market in 2016.**

Developed in response to a number of deadly incidents involving the use of incorrect cleaning equipment in explosive atmospheres, Ruwac sought to engineer a system safe for use in these specialized environments.

Manufactured to the highest standards - our poles are made from 100% Carbon Fiber and are tested and certified to NFPA standards.

The system is fully accessorized with a range of conductive and anti-static accessories for flexible cleaning options.
