

# #9949120

## Onboard Transfer System for MX360 Series :

Ruwac's non-sparking, stainless steel cyclonic pre-separator attachment reclaims expensive Additive materials for reuse. NEVER throw away material again with this 95(+)% efficient HEC system that can be customized for any application. Boost your team's efficiency and production today!

**Ruwac**

\*Shown with MX361EX - Industry Leading Immersion Separation Vacuum System

#9949120

Optional "discharge settling chamber"

Call (413)532-4030 to speak with a Sales Rep!

- The stainless steel pre-separator easily mounts onto any Ruwac MX360 Series Vacuum
- Reclaim and reuse expensive Additive Manufacturing materials
- Increase production rates while also reducing expenses by limiting material waste
- Optional "discharge settling chamber" for reduced maintenance and visualization of material build up
