FOR IMMEDIATE RELEASE:

Ruwac USA Introduces: The Explosion Proof Series

Holyoke, MA – *Ruwac USA* is one of America's most innovative designers and manufacturers of technologically advanced, superior quality industrial vacuum systems for virtually all industrial applications.

We have industry-leading filtration systems with innovative design and reliability. *Ruwac* equipment is suitable for various applications, including protecting workspaces from combustible dust, general housekeeping, overhead cleaning, and point of source dust collection.

Ruwac recognizes the seriousness of the potential deadly hazard found in combustible dust or conductive metals and offers a complete line of [explosion proof vacuum systems](#).

Featuring fully grounded, static dissipating designs that are guaranteed to be spark-free, *Ruwac's* **explosion proof vacuum cleaners** are made in the USA from the highest quality materials that can be custom fit to your needs.

Common Applications Include:

- **Ordinary Locations** – suitable for general housekeeping in a non-classified atmosphere.
- **Class II, Div 2** – designed for the safe collection of combustible dust where the dust is not suspended in an ignitable concentration.
- **Class I (Group D), Class II (Groups F & G)** – certified for use in classified environments for the safe collection of combustible dusts where ignitable dust or vapors may be present.
- **Group E Metals, Explosives and Propellants** – *Ruwac's* Immersion Separators recover highly combustible materials by submerging 100% of the intake air in liquid bath, ruling out the chance of an outside ignition source entering the wet mixer vacuum.
- **Intrinsically Safe Air Powered** – designed for combustible dust and hazardous locations. It is the safest alternative power explosion proof vacuum cleaner for use in **Class I and Class II environments**.

GOT COMBUSTIBLE DUST? NEED HELP CHOOSING THE PROPER VACUUM?

Step 1: Is your dust combustible?

Step 2: Is your atmosphere classified?

Step 3: How much combustible dust is present?
