MX361EX: 12 gallon liquid tank

MXR FILTRATION SYSTEM

REMOVE THE SOLIDS AND RECYCLE THE LIQUIDS

WHEN?

NFPA requires you to empty the immersion tank when one of these occurs.

- At the end of every day or...
- When the sludge = 5% volume / immersion tank or...
- When there is 20 lbs. of sludge.

3-4 Buckets

HOW MUCH?

- Water + Sludge = 15 gallons of waste (estimated).

Clean Filter

DISPOSAL?

- National Average of hazardous waste disposal = \$9.00 / gallon.

Emptying Material Costs:

Daily: 5 days a week x 52 weeks / year = 260 days

Emptying: 15 gallons x 260 = 3,900 gallons

Hazardous Disposal: 3,900 gallons x \$9.00 / gallon = \$35,100

SOLUTION:

Using the MXR331, remove the sludge and reuse the water minimizing your hazardous wastes.
